

PhD in Crop Science XXXIV cycle: Final seminars

Final seminars give our PhD candidates an opportunity to make a public presentation of the final draft of their PhD thesis before the submission and get feedbacks from the teachers' board.

Time and place: *Sept. 7, 2021 9:30 AM–2:00 PM, and Sept. 8, 2021 9:30 AM-11:00 AM, Cà Gialla, Room 19*

Sept. 7, 2021:

Following PhD candidates will present their PhD thesis with a working title:

9:30-10:00 AM

Silvia Brojanigo: *Engineering of suitable bacteria to produce polyhydroxyalkanoates from organic waste streams*

10:10-10:40 AM

Costanza Geppert: *Biotic and abiotic drivers of plant redistribution under global change.*

10:50-11:20 AM:

Matteo Marchioro: *Development of protocols for surveillance and monitoring of alien pests in points-of-entry and surrounding forests*

11:30-12:00 AM

Giacomo Ortis: *Studying Orthoptera: from outbreaks to conservation*

12:10-12:40 AM

Anna Panozzo: *New agronomic and ecosystem approaches for improving resilience and quality of wheat against abiotic stresses*

12:50-13:20 AM

Francesco Scariolo: *Applied genomic tools for plant variety breeding, breeders' rights protection, and food traceability*

13:30-14:00 AM

Felice Sartori: *Impact of tillage system and soil covering on soil properties in Veneto Region*

Sept. 8, 2021:

Following PhD candidates will present their PhD thesis with a working title:

9:30-10:00 AM

Mizuki Uemura: *Movement ecology and social behaviour of processionary caterpillars from Australia and Europe*

10:10-10:40 AM

Enrico Ruzzier: *Entangling the Enemy: Ecological, Systematic and Medical Implications of Dermestid Beetle *Hastisetæ**

Seminars will also be available online at:

<https://unipd.zoom.us/j/89026109417?pwd=S3hYbnlqQ1dpaFlrc3Rxazc1R2FnQT09>

per entrambe le giornate). Although is strongly encouraged to attend seminars in presence.

The event is open to all PhD students also for familiarizing themselves with the structure of the event.
